Mickle

THE NO 1 SPRING FEED BARLEY FOR IRISH GROWERS

- » Mickle has the best bushel on the RL 2018
- » Excellent resistance to Rhynchosporium and benefits from a good, early disease programme
- » Earliest spring barley variety currently available which is a major bonus if drilling is delayed

KWS Irina

RELIABLY HIGH YIELDS WITH EXCELLENT DISEASE RESISTANCE

- » Very high yield potential, good resistance to lodging and straw breakdown
- » Excellent overall disease resistance. Suits early drilling where disease pressure is high or where stubbles were diseased over winter
- » Excellent straw characteristics suiting high fertility sites and first rotation feed situations

Propino

DUAL PURPOSE MALT/FEED VARIETY

- » Propino is a dual-purpose variety with the lowest screenings on the DAFM Rec List 2018
- » Excellent grain quality, which has ensured its delivery to the feed and malt industry over a long number of years
- » Tall variety which needs a robust fungicide programme to deliver its full potential
- » Choose for grain quality and consistent performance

Laureate

A FIRM FAVOURITE WITH THE BREWING & DISTILLING INDUSTRY

- » First malting barley that successfully combines the 'zero GN' trait with excellent yields, grain quality and disease resistance
- » Highest yielding non GN variety and best overall disease rating on the DAFM Rec Malting List

KWS Canton

NEW FOR 2018

- » Excellent yield potential
- » Very good overall disease resistance
- » Excellent bushell weight

RGT PLANET

RGT Planet

Performing well on Irish RL

- » Excellent yield potential
- » Excellent Rhynco and mildew resistance
- » Needs management to prevent lodging
