

HYBRID

Dariot

NEW HIGH PERFORMING HYBRID VARIETY

- » Excellent yielding variety on the Irish National List / Recommended list 2016 at 104
- » 1.5 million live seeds per pack will deliver high germination levels in the field
- » New PNN variety (Post NeoNicotinoid) which aids quick establishment without neonicotinoid seed dressings
- » Very good resistance to lodging and excellent stem canker resistance with a maximum score of 9 on AHDB list 2018 for North Region

Tim's Variety Picks

"It's hard to look past Anastasia (No1 performer in DAFM trials) and Dariot which is bred for its rapid autumn growth and anti-pod shatter characteristics"

Incentive

CONSISTENTLY HIGH GROSS OUTPUT

- » Outstanding vigour in the first 45 days of growth
- » Excellent resistance to lodging and stem stiffness
- » Unbeatable yield stability in all soil types
- » Very good resistance to light leaf spot

CONVENTIONAL

Anastasia

SUITABLE FOR LATE DRILLING AND EXCELLENT LODGING RESISTANCE

- » Highest yielding on AHDB Rec. List 2017/18 - North Region
- » Excellent resistance to lodging
- » Medium - early flowering
- » The highest yielding conventional variety on the Irish National List / Rec. List 2016
- » Very good resistance to light leaf spot and stem canker

Elgar

IMPRESSIVE NEW TOP YIELDING CONVENTIONAL VARIETY

- » Highest gross output yield of 110 on AHDB Rec. List 2017/2018 East/West Region
- » Early maturing with short stiff straw
- » Good lodging resistance
- » High resistance to light leaf spot

Picto

PICTO HAS VIGOROUS EARLY GROWTH AND BIG, FLESHY LEAVES PRODUCING AN EXTREMELY STIFF, LODGING RESISTANT CANOPY

- » High yielding variety on AHDB Rec. List 2017/18 - East/West Region with score of 8 for both lodging and stem stiffness
- » Medium height and early - medium maturity
- » Good stem canker and LLS resistance
- » It is very popular on farm due to its consistent performance
