

# WINTER OAT

The ideal variety that combines high yield and quality, suitable for winter and spring sowings.

**HUSKY** - has become the farmer's favourite and has replaced Barra as Ireland's no. 1 oat variety

- Short straw, very good grain quality and has good resistance to lodging
- An early maturing, very high yielding variety
- Good all round disease package
- Suitable for all situations

AVAILABLE  
autumn 2015  
& spring 2016

*"As all trials favour medium to late maturing varieties, I believe that Husky, being an early maturing type, will actually perform better on farm than trial results suggest"*  
Patsy Kehoe, Seedtech Trials Manager

## VODKA

A true winter oat variety

- Winter hardy
- High yielding
- Good hectolitre weight

AVAILABLE  
autumn 2015  
as it is a winter variety only

**Note:**

Spring varieties of oats sown in the autumn can suffer crop winter kill damage

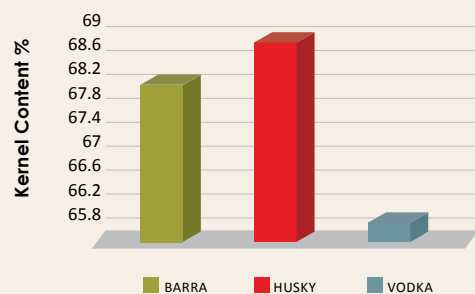

Avoid winter kill by planting winter oat varieties
