

WINTER WHEAT PORTFOLIO

SITUATIONS

GRAHAM FULLY RECOMMENDED	SY INSITOR Prov. RECOMMENDED	ASTRONOMER CANDIDATE
The most reliable winter wheat	Very high yield potential	The most complete wheat coming through DAFM RL trials
Very reliable disease resistance esp in 2021 in high pressure situations	Out-performs in second and continuous wheat slots	If you look at the traits, SY Astronomer wins on its agronomy package
Suits early drilling	Suits later drilling	Low risk of sprouting, and Fusarium, and good straw strength

GRAHAM

WINTER WHEAT

THE MOST RELIABLE WINTER WHEAT

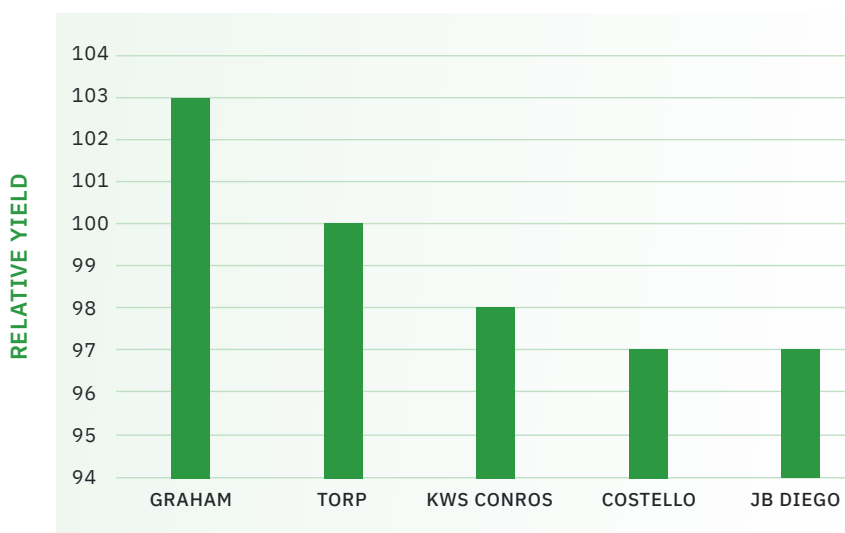

- ✓ Suitable for early drilling
- ✓ Slow, steady spring growth with early ripening and harvest date
- ✓ High-yielding, early maturing variety
- ✓ Reliable disease resistance for septoria, rust and mildew
- ✓ Excellent disease profile gives extra flexibility when application timings are compromised
- ✓ Bright, clean head delivering well filled grains
- ✓ Stiff to stand & early to ripen
- ✓ Performs extremely well on both light and heavy soils
- ✓ Exceptional grain quality

You can RELY on GRAHAM for:

- Consistently high yields
- Excellent disease resistance
- Early harvest date

THE MOST RELIABLE WINTER WHEAT TO DRILL IN 2021

VARIETY PROFILE – YIELD

“
GRAHAM is the highest yielding winter wheat on DAFM REC list
 Tim O'Donovan, Technical Director

GETTING THE MOST FROM GRAHAM

- Suitable for early drilling as slow autumn and early spring growth
- Drill 300 seeds/m² up to mid October to maximise tiller capacity
- Grows rapidly after gs 30 to help yield forming leaves move away from septoria
- Good disease scores help keep to planned fungicide budgets
- Early to harvest so helps spread workload
